Machine Learning MC886

University of Campinas (UNICAMP), Institute of Computing (IC)
Project Baseline, 2019s2, Prof. Sandra Avila

Baseline

The project baseline should be described in one/two pages. It should contain:

1. What is the baseline (your first result) for the problem you are investigating? Describe the technique (for example, the network architecture) and discuss the result achieved.

2. How do you plan to improve your baseline? Give a brief description.

3. If you are using an existing implementation, make it clear.

Deadline

Saturday, October 19, 11:59pm.

Submission

The project baseline should be written in Portuguese or English (2 pages max.).
Submit a PDF file, via Moodle.
This activity is **NOT** individual, it must be done in teams of **3-4 members**.
